ENERGY HEALING

TEL : 916-492-9153

WHAT IS ENERGY HEALING?

Energy healing is a process of transferring energy from the spiritual or universal realm to the client by means of lightly touching the person. The practitioner can also transfer the energy by holding their hands a short distance away from the client as well, but we have found that the energy transmission is much stronger with a gentle touch. The client remains fully clothed and relaxes in a chair or reclines. Most clients will feel a sense of calmness and relaxation, after the session. Some may feel energized and full of vigor. The results will vary with each client and it is the body's subtle energy centers that are being aligned and supported during the session. Each person will have a different experience as each person's subtle energy body is unique.
